# WHITE PAPER DISCLAIMERS

*We are not in any way affiliated with the ShibaSwap team. We are Ryoshi*

Note that this is a whitepaper highlighting the features, benefits, and future plans PawZone has to offer. Smart contracts, distinct parameters, deployed application addresses, SDKs, specific protocols, and systems will be released at a later date.

A step-by-step comprehensive manual of our applications informing users how to use them will be released when our applications are closer to launch.

Our applications are EVM compatible in line with Shibarium.

No VC has been involved. Everything has been funded entirely by the team.

We could have VC's by sending them a large allocation like most other projects, but we believe in the true incentive behind the blockchain which is the ability to put the power in the right hands, not the wealthy.

### **Why the Shibarium Network?**

The Shibarium Network is the network for the Shiba Inu ecosystem and offers a much cheaper alternative to the Ethereum Network. Given a faithful community as well as an effective layer 2 solution, the popularity of a marketplace and gaming guild seems inevitable.

### **Wen Shibarium?**

Shibarium is expected to be released sometime this year. Updates are expected to come soon.

# BUSINESS MODEL

A civilization is nothing without the community that surrounds it. Building utility for the Shiba Inu ecosystem will always be the top priority of PawZone.

## **Brand messaging**

PawZone

### **Mission Statement**

Empowering generational wealth creation while bridging the Shiba Inu community with the NFT & play-to-earn space.

### **Vision Statement**

To cultivate a joyful and fulfilling experience of financial growth by leveraging applications that prioritize individuals' intrinsic value.

### **Slogan**

Building Wealth, Uniting Communities, Shaping the Future

# PAWZONE OBJECTIVE

Our objective is to create lasting generational wealth by fostering a strong sense of community and collaboration between Shiba Inu enthusiasts and the broader NFT and play-to-earn ecosystem.

We strive to offer unparalleled opportunities for financial growth and independence, leveraging the potential of emerging technologies. By connecting the Shiba Inu community with the dynamic world of NFTs and play-to-earn initiatives, we aim to bridge the gap and unlock new avenues for prosperity.

Through our dedication to excellence, transparency, and inclusivity, we provide reliable and user-friendly applications that enable individuals to participate actively in utilities our platforms offer. We are dedicated to democratizing access to wealth-building opportunities, ensuring that our applications remain open, accessible, and supportive to all who wish to explore and thrive in the Shiba Inu, NFT, and play-to-earn space.

Our commitment extends beyond financial success. We prioritize education, providing resources and guidance to help individuals navigate the complex landscape of NFTs and play-to-earn opportunities. By providing our community with the necessary knowledge and tools, we strive to create a sustainable and inclusive ecosystem that benefits individuals from all walks of life.

Join us on this transformative journey as we bridge communities to unlock the full potential of the Shiba Inu ecosystem within the exciting world of NFTs and play-to-earn initiatives.

# PAWFIGHTERS

A community that stands up for one another and helps them achieve the same fortunes are deemed for success. There exists no stronger community in the crypto space and. We are all Ryoshi.

With fierce determination and unwavering loyalty, the Pawfighters stand as a mighty force, guarding the ShibArmy against the looming threat of Shadowcats, and igniting within their hearts the flames of creativity and innovation, inspiring them to shape their ecosystem as they see fit.

*In the darkest hour of the night,*

*When shadows loom and hope takes flight,*

*A flicker of light breaks the fright,*

*And shows the way to a new height.*

**Shibarium will pave the way for endless possibilities in expanding the Shiba Inu ecosystem and we will be one of the first to venture in this frontier.**

# BUSINESS MODEL

Empowering Artists. Engaging Community. Redefining NFT Marketplace Excellence. Trust our platform to prioritize artists and users with transparency, low fees, robust support, and innovative features, setting a new standard for customer centricity in the NFT community and Shiba Inu ecosystem.

## Brand messaging

Pawzaar

### Mission Statement

Placing the utmost importance on artists and users through transparency, the lowest transaction fees, customer support, and innovative features for both the NFT community and Shiba Inu ecosystem.

### Vision Statement

To create a new standard around customer centricity in the world of NFT marketplaces through trust.

### Slogan

Serving Artists and Empowering Collectors

# PAWZAAR

Pawzaar is the first NFT marketplace built for the Shiba Inu ecosystem and designed to be fully operable with the Shibarium network. It offers users the ability to buy, sell, trade, and lend out NFTs, providing a smooth experience with low gas fees and quick transaction speeds. Pawzaar introduces a deflationary mechanism for \$SHIB, where a portion of every transaction fee is reserved and sent to the \$SHIB burn address. **We aim to become the primary NFT marketplace for the Shibarium Network.**

Pawzaar is not a fork and contains an addicting UI/UX built from the ground up. PawZone offers the best royalty rates for NFT developers (up to 10%) and the lowest fees for the users (1.8%).

Our marketplace will accept several currencies and even NFTs as a means of purchase. Furthermore, a percentage of EVERY transaction will be sent to the \$SHIB burn address. Pay with any available currency to purchase or lend NFTs that will then be swapped for the token requested by the seller.

## Main Functionalities

**Buy and Sell NFTs:** Users can buy and sell NFTs using different currencies. They can make transactions with \$PAW, \$ETH, \$USDC, \$SHIB, or \$SHI (once the stable coin is released) and purchase NFTs that will be swapped for \$SHIB. Sellers can only list their NFTs for \$SHIB.

**Trade NFTs:** Pawzaar introduces the unique feature of trading NFTs for other NFTs, similar to how assets are traded in MMORPGs. Users can propose a trade to another seller, who can then accept or decline the offer.

**Lend Out NFTs:** We allows users to lend or rent out their NFTs, providing temporary access to the utility or gaming features of a collection. Users can list their NFTs for lending, subject to the standards set by the DAO. Lenders can only list for \$PAW.

**Deflationary Mechanic:** Pawzaar incorporates a deflationary mechanic by sending a portion of every transaction to the \$SHIB burn address. This ensures a continuous reduction in the supply of \$SHIB tokens.

## TRANSACTION FEES

Pawzaar contains some of the lowest transaction fees at 1.8% (0.5% goes to the \$SHIB burn address, 0.3% goes to the treasury, and the remaining 1% gets redistributed amongst the community). Unlike most other marketplaces, the team does not pocket a single penny in fees. More specifically, Pawzaar redistributes all the potential profits made from transaction fees.

## TRADING REWARDS

8% of the total token supply is reserved for those who transact on Pawzaar. Rewards will be issued weekly to users depending on the amount of active participation. Distributions will be relative to the amount in sales or purchases that had been made that week. This process will keep occurring as a percentage of transaction fees will be set aside for Pawzaar trading rewards.

*Creators will receive an initial bonus for selling their NFTs within the first 2 months.*

## \$SHIB BURNS

As previously stated, 0.5% of every transaction fee on Pawzaar will be burned. Additionally, when you list an NFT that you have purchased or created, you can manually decide what percentage of the proceeds from the sale will be allocated to the \$SHIB burn address. This enables NFT sellers to actively participate in reducing the token supply and contributing to the ongoing burns, further increasing the scarcity of \$SHIB tokens within the ecosystem.

# INNOVATION

## AUTO-CONVERTING TRANSACTIONS

We have placed innovation at the forefront with the ability to auto-convert your currencies. Let's say you would like to buy NFTs with \$ETH but the seller is requesting to pay in \$SHIB. Thanks to the power of auto-converting transactions, you can now use your \$ETH to make the purchase and it will then automatically convert to \$SHIB. In other words, if people used their \$ETH to purchase an NFT, it would be no different than converting your \$ETH for \$SHIB which will increase the price of \$SHIB.

Sellers can only list their NFTs for sale in \$SHIB. This means that you cannot list your NFTs for Ethereum and USDC; you can only purchase NFTs with them. As a result, people will end up swapping their Ethereum and USDC for the Shiba Inu tokens which would be beneficial for the ecosystem. Just like other networks, their marketplaces use their native currencies. This is why once we end up on Shibarium, it only makes sense to limit purchasable currencies to the Shiba Inu tokens. But maybe it is not necessary to do so and there is room for the other currencies as well)

## TRADING NFT(S) FOR NFT(S)

We would also like to introduce you all to the concept of trading NFT(s) for NFT(s). Just like how many MMORPGs handle trading assets, we will be implementing the same concept for NFTs. If you want to trade your NFT(s) for someone else's, you can provide them with the offer and the seller can either choose to accept the deal or not. In other words, there is a mutual agreement before the transaction can be made.

## RENT NFTs

Pawzaar will allow members to lend or rent NFTs for a fixed period. Whether it be for metaverse items or temporary access to the utility a collection provides, users can now let others borrow their assets for a fee they determine.

Here's how it would work: Lenders set a rental price and time along with a collateral amount for every NFT they list. When the renter agrees to pay the rental fee on top of the collateral amount, the NFT is sent to their wallet while the collateral is stored in the PawZone Safe. Once the rental time is over, the borrower will have 3 days to press the "return asset" button and will in turn receive their collateral back. If they fail to do so, the owner will have the right to keep the collateral amount.

In a world where metaverses are mainstream experiences, renting will be a necessity. Whether you want to borrow items like clothing, vehicles, or gain access to exclusive experiences, renting will be a highly requested functionality. We want to be innovators in the crypto space as a whole and we feel as though this feature has not yet been perfected. We believe we have a method that will be replicated as the standard for renting NFTs.

**NFT rental fees along with the collateral amounts can only be in PAW.**

## CREATE YOUR OWN NFTs

Users will be able to create their own NFTs and sell them on their store page. We will also contain a launchpad for projects to help members create a collection that will then be minted directly on the Pawzaar platform. We will start things off with our very own NFT collection filled with perks in the marketplace and 100% of the net profit from the mint will be sent to the \$SHIB burn address. We have established several partnerships for future collections that will be announced later on.

There will be the ability for users to effortlessly bulk mint their entire NFT collection directly from our platform. Recognizing the need for a streamlined and efficient process, we have developed a groundbreaking solution that simplifies the minting process, saving users valuable time and effort. By leveraging our intuitive interface and advanced minting tools, individuals can upload and mint multiple NFTs in a single batch, eliminating the tedious task of minting them one by one. This not only enhances the user experience but also enables creators, artists, and collectors to rapidly showcase their entire collection on our platform, maximizing efficiency and fulfilling simplicity.

Users will be able to create and showcase their own customizable marketplace NFT storefronts, seamlessly integrated within their profile pages. Pawzaar allows individuals to take full control of their creative endeavors. By leveraging our cutting-edge tools and technologies, users can curate and exhibit their unique NFT collections, establishing a direct connection with a global community of art enthusiasts, collectors, and investors.

We made the interface very straightforward to make the creation process as fluid as possible.

## PLATFORM OVERVIEW

### LIBRARY

The user's library on our NFT marketplace offers a personalized and organized space for users to showcase their NFT collection. Each account has the option to set up a profile image and include their social media links. The profile library allows users to display all the NFTs they own or have created. Users can effortlessly monitor their activity, including listings and NFTs they've favorited, ensuring they have a clear overview of their interactions within the marketplace. This page lets users navigate and manage their NFT portfolio with ease.

### COLLECTION STORE PAGE

The store page of a particular collection is where users can browse NFTs on the market. Each store page includes a detailed description of the collection, allowing users to gain a deeper understanding of its theme and concept. Users can access information such as the social media links associated with the collection, the creation date, the creator's username, the total number of items available, the floor price indicating the lowest listed price, the total volume of transactions, and the number of unique owners who possess items from the collection. Furthermore, we provide an analytics page dedicated to each collection detailing useful information that educates the user.

### EXPLORE AND STATS

The explore page lets users navigate through various categories such as art, gaming, or music to discover NFTs that align with their preferences and see what's trending. Additionally, users can explore the top collections with the stats page, gaining insights into the most popular and highly sought-after NFTs in the market. Moreover, users can explore other users' profiles, gaining inspiration and discovering new collections based on what other enthusiasts hold.

### COMPLEX ANALYTICS

Our marketplace is equipped with a robust set of tools and analytics designed to empower NFT collectors with valuable insights. From individual project details to the broader NFT market trends, our platform enables users to access critical information effortlessly. Through intuitive charts and data, users can closely monitor key metrics such as sales volume and average sale price for specific NFT collections. Furthermore, we provide comprehensive analytics encompassing the entirety of Pawzaar, allowing users to gain a holistic understanding of the platform's performance. With an emphasis on user experience, our platform presents this wealth of information in a clear and organized manner, ensuring users can navigate and utilize the data effectively.

### LISTING NFTs

For purchased NFTs, you can set the desired price, specify the duration of the listing, and even determine the percentage of the sale that will be burned, contributing to the sustainability and growth of the ecosystem.

If you're listing an NFT that you created, you can choose the supply of your NFT, give it a unique name, and provide a description that highlights its features, and input social media links. You are then given the option to select the appropriate collection you would like the NFT to be a part of. Furthermore, our platform supports the inclusion of properties, levels, and stats, enabling you to add layers of depth to your NFT, enhancing its overall value and desirability. The same factors apply when bulk minting an entire collection as opposed to a single NFT.

## NFT LAYOUTS

Users can choose from three distinct layouts for displaying their NFTs: default, large, and list. The default layout presents NFTs in a balanced and visually appealing format, providing an intuitive browsing experience. For those seeking a more immersive view, the large layout showcases NFTs in a prominent and visually striking manner, allowing users to appreciate the intricate details. On the other hand, the list layout offers a concise and streamlined presentation, ideal for users who prefer a comprehensive overview of a collection. With these diverse layout options, users can personalize their viewing experience and explore NFTs in the most engaging and convenient way that suits their preferences.

## PROPERTIES

The majority of NFTs possess a distinct set of traits that define its individuality, whether it's the eyes, land, sound, or other defining characteristics. These traits allow collectors to curate a diverse collection tailored to their preferences. From rare traits that enhance value and desirability to dynamic traits that bring motion and interactivity, NFT traits elevate the experience of owning and trading these digital assets. By utilizing trait-based filtering, you can easily narrow down your search and display only the NFTs that possess the specific traits you desire.

## FILTERS AND ORDERING

Pawzaar allows you to filter and determine an ordering preference which enhances the browsing experience for users. With the ability to filter collections and access a variety of ordering options, users can easily customize their search to find exactly what they're looking for. Located on the left side of numerous pages, the filter options provide a convenient way to refine search results based on specific criteria. And when users want to reset their filters and broaden their search, they can simply click on the "Clear filters" button.

## VERIFIED COLLECTIONS

We have implemented a verification system that distinguishes collections by a checkmark, signifying their legitimacy. After creators apply for verification, we will see if the project meets the conditions. To be eligible for verification, a project must demonstrate a minimum total trading volume of at least 15,000,000,000 SHIB. We will check to see that the NFTs have accurate metadata. This rigorous criterion ensures that only established and reputable projects receive the coveted verification status, providing users with added confidence and assurance when engaging with these collections.

## SPOTLIGHT

Pawzaar offers a distinctive spotlight feature that showcases NFTs on our front page. This provides artists with increased visibility and recognition within our community of collectors. We will carefully curate and decide which artworks will be featured, ensuring that only the most noteworthy pieces receive this placement. By highlighting these creations, we aim to promote talent, inspire creativity, and connect creators with a broader audience of passionate collectors who appreciate their work.

# PRIORITIES

## PREVENTING WASH TRADING

At our NFT marketplace, we are committed to maintaining a fair trading environment by implementing measures to mitigate wash trading. Wash trading refers to the practice of artificially inflating trading volume by buying and selling assets among individuals or entities to create a false impression of market activity.

To address this issue, we have implemented robust monitoring systems and algorithms that can detect suspicious trading patterns and identify potential instances of wash trading. By promoting integrity and discouraging wash trading, we aim to foster a healthy marketplace where genuine trading activities are rewarded and the overall ecosystem thrives.

## SECURITY

Security is of utmost importance for an NFT marketplace, as it involves the trading and ownership of valuable digital assets. Conducting a thorough audit is a critical step to ensure the platform's robustness and resilience against potential vulnerabilities or exploits. By performing an audit, the marketplace can identify and address any security weaknesses, establish trust with its users, and provide a secure environment for the buying, selling, and storing of NFTs. An audit serves as a validation of the platform's security measures, demonstrating a commitment to protecting users' assets and fostering a safe marketplace ecosystem.

## SUPERIOR CUSTOMER SUPPORT

We value our users and artists which is why customer support is a top priority of ours at Pawzaar. Your questions will be answered. It is important to note that we will be advancing customer support to offer something of unmatched quality and we wish for the DAO to make important decisions when it comes to building the perfect customer support methods.

# FEATURES

*Pawzaar is jam packed with features to make the user experience as enjoyable and efficient as possible.*

## NFT BRIDGE

With the upcoming network comes the need to bridge all Shiba Inu-related collections. You will be able to bridge your NFTs from Ethereum to Shibarium. NFT bridging will enable users to bring their Shiboshi, Welly Friend, Shib Yard, and all other NFTs onto the Shibarium network. This feature serves as a vital tool for the upcoming SHIB metaverse project, providing users with the means to integrate and utilize their NFT assets into the Shibarium ecosystem.

## LAUNCHPAD

Our NFT marketplace offers a dedicated launchpad where projects can receive help with funding, marketing, and preparation in order to launch their unique NFT collections. As part of our commitment to supporting and fostering the growth of the Shiba Inu ecosystem, a percentage of earnings from NFT projects minting on our launchpad will be converted into \$LEASH and sent to the burn address. This mechanism not only helps drive the value of \$LEASH but also contributes to the overall sustainability and longevity of our platform. By providing a launchpad for NFT projects, we aim to provide creators with all the necessities to showcase their art and creativity to a wide audience of enthusiasts.

## SHIBARIUM NFT CALENDAR

A comprehensive and user-friendly platform that keeps you up to date with all the upcoming NFT collections within the Shibarium network. Our calendar provides a centralized hub where enthusiasts and collectors can access information about the release dates, artist collaborations, and unique features of each upcoming collection. You will be able to stay ahead of the game by setting reminders, exploring previews, and planning your acquisition strategy for the latest Shibarium NFT drops. With the Shibarium NFT Calendar, you'll never miss an opportunity to own remarkable artworks and collectibles within the Shiba Inu community.

### RARITY TRACKER

Our rarity tracker will provide invaluable insights into the scarcity and uniqueness of NFTs within a specific collection. These tools enable collectors and investors to assess the relative rarity of different traits, attributes, or combinations thereof, allowing them to make informed decisions based on rarity data. By utilizing rarity trackers, users can identify rare and highly sought-after NFTs, enhancing their overall experience in navigating the marketplace and building their collections.

### SALES TRACKER

There will be a sales tracker feature that allows users to stay informed about the sales of their favorite projects. By simply pressing the designated button within each project, users can opt to receive notifications whenever a sale occurs. This real-time tracking capability allows collectors and enthusiasts to stay updated on the market activity of specific projects of interest.

Furthermore, users have the option to customize their notifications by filtering them based on specific price points, ensuring that they receive updates on sales that align with their preferences. With our sales tracker feature, users can effortlessly monitor the sales dynamics of their preferred projects.

### ADDING FUNDS USING THIRD-PARTY PLATFORM

If you do not have funds in the wallet you currently hold or wish to hold another token, there will be the ability to purchase any of the accepted currencies using a third party application that is Shibarium-compatible. There will also be an option to purchase more on ShibaSwap directly on our platform.

### AR/VR CAPABILITIES

We go beyond the ordinary by embracing the future of digital art and innovation. Our sights are set on the forefront of technological advancements. With AR/VR NFT capabilities, we aim to unlock a world of endless possibilities and push the boundaries of creativity, recognizing the immense potential that AR/VR NFTs hold in shaping the future of the NFT space. By embracing this emerging technology early on, we are paving the way for groundbreaking experiences and revolutionizing the NFT landscape.

## CONCLUSION

Pawzaar is poised to become the leading NFT marketplace for the Shiba Inu ecosystem, offering a range of innovative features and functionalities. Users will buy, sell, trade, and lend out NFTs with low gas fees and quick transaction speeds. We introduced a deflationary mechanism for \$SHIB, burning a portion of every transaction fee and reducing the token supply over time. Pawzaar's addicting UI/UX, along with the best royalty rates for NFT developers and the lowest fees for users, ensures a user-friendly and cost-effective experience. The platform supports multiple currencies, including \$SHIB, \$LEASH, \$BONE, \$PAW, \$ETH, \$USDC, and \$SHI (coming soon). Our platform offers innovative features that will revolutionize the NFT space like auto-converting transactions and NFT trades. By prioritizing user rewards and preventing wash trading, we strive to foster a fair and thriving NFT platform.

## INTAKE FORM

Artists that would like to end up on our launchpad or be sponsored on our marketplace with a spotlight will have the opportunity to apply by filling out our intake form coming soon.

### **CHANGING LIVES ONE GAME AT A TIME**

Getting paid to play video games is the dream that seems too good to be true. Yet it has become a reality and is already changing the economies of people in SouthEast Asian countries. We've seen the Philippines flourish thanks to the likes of play to earn games such as Axie Infinity.

### **SHIBA INU GETTING READY**

The Shiba Inu ecosystem is prepping up early towards the play to earn gaming revolution. Other than the Shiba Inu Eternity game that has recently been released, the Shiba Inu team is working alongside Marcie and The Third Floor to create the upcoming Shiba Metaverse project.

# SHIBA INU GG

Blockchain guilds today are unpolished and the user experience feels more like you're searching through a forest without a clear-cut guide. The process of becoming a scholar and actually getting to use assets is very complicated. There is nothing appealing about the user interface and nothing to keep you engaged. We aim to fix all these issues and bring innovation at the forefront. **We will create a polished platform that makes the onboarding process simple and intuitive. Moreover, we want to ensure that the guild experience is fun and addicting.**

Shiba Inu Gaming Guild will give you passage to assets from a large variety of blockchain games that have a high barrier to entry without paying a dime and the member keeps most of the earnings in return. Sounds great, right? Moreover, all our in-game assets will be chosen by the DAO.

## Guild Members

To become a guild member, you must acquire a free badge from Pawzaar, with the only requirement being payment of the gas fees for the transaction. Upon joining, you will have the option to select from various factions, but please note that your choice of faction cannot be altered later, so choose wisely.

As a member of the guild, you will gain access to exclusive opportunities typically reserved for Scholars, distinguishing us from other guilds. Any guild member has the ability to rent assets but must provide the necessary collateral in order to do so. Moreover, all guild members are able to participate in Shiba Inu GG events.

## Scholarship Programs

To access assets without collateral, aspiring individuals must first join the Shiba Inu GG Scholarship Program. These programs, offered by guilds, serve as a means to enhance their talent pool, promote their brand, and contribute to the growth of the gaming community.

Interested candidates are required to apply for the scholarship program by submitting an application that details their gaming experience, achievements, skills, and relevant portfolio or work samples. The guild or a designated committee then reviews the applications and **selects recipients based on specific criteria, such as skill level, dedication, and potential.**

Recipients gain access to coaching sessions, workshops, or training programs facilitated by experienced gamers or industry professionals within the guild. They also have the opportunity to connect with notable gamers, industry experts, and fellow Scholar recipients. Attendance at conferences or gaming conventions and the showcasing of their achievements through Shiba Inu GG will elevate their visibility within the crypto gaming community.

By participating in the scholarship program, individuals can establish a solid foundation for pursuing a career in the industry. Scholarship applications will be released soon.

### **PawZone Guild Agents**

Anyone can become a Guild Agent. Agents are responsible for recruiting and training new players. Under our scholarship model, Guild Agents will receive a fixed commission of 20% based on what every member they recruited makes on the platform. The submission process will be simplified and straightforward to maintain ease of use. The more members you are able to recruit, the more you can potentially earn passively.

Play-to-earn gaming is the future of gaming and it's better to be involved sooner than later. We are early in its adoption and there is still so much room for innovation. With an established team with years of experience in the field, we are destined to become an influential player in web3. There are an increasing number of guilds being developed and we want to make sure the Shiba Inu community joins us before putting in numerous hours elsewhere. Choosing a guild is a big commitment and leaving one to join another would be daunting. Shiba Inu GG will have a lot more to offer than what has come before it and will stand the test of time. Moreover, it will be the first guild truly built for the Shiba Inu community and blockchain gamers alike.

Something to take into consideration is that guilds cannot operate solely on the Shibarium network since play-to-earn games and metaverses will be on multiple networks. While it is easy to expect some of the greatest play-to-earn games on Shibarium, there will also be assets from games on Ethereum which do not have cheap transaction fees or other networks like Solana that will need to be converted to PAW and then bridged over to the Shibarium network. This is why a part of what the guild earns will be devoted to transaction costs.

## PAYOUT STRUCTURE

 **Member: 60 - 80%**

 **Agent: 20%**

 **Shiba Inu GG: 20-0%**

20% will be sent to the **guild rewards pool**

20% will be distributed to **team** and funding of the **transaction costs**

20% of what the guild earns is sent to the **treasury**

20% used to reward those keeping their **unclaimed rewards on PawFi**

20% of what the guild earns will be sent to the **\$SHIB burn address**

*What the guild earns are the native currencies of the games people are playing so it won't negatively affect the PAW price.*

**You will earn a token of unmatched utility when contributing your mighty skills and efforts towards the good of the guild. We offer you passage to assets from a large variety of blockchain games.**

All earnings obtained using various blockchain games are converted to PAW (except for what Shiba Inu GG collects) and distributed as follows:

- Members will start off earning 60% of the profits but are eligible to receive up to 80% of what they earn using the assets they borrow depending on the level they are on. **The higher the level, the more \$PAW you are rewarded for completing tasks. However, you must pay in \$PAW to level up which is then sent to the burn address.**
- The manager collects a fixed 20% of the profits.
- Shiba Inu GG collects at most 20% of the profits the scholars generated using our assets. We do not earn anything for scholars at the highest levels. Of the 20% potential profit, it is then distributed further as follows:
  - 20% is converted to either \$PAW or \$SHIB before being sent to the guild rewards pool for further reward distribution to those completing our tasks or faction tournaments
  - 20% is distributed to the team and the funding of transaction costs
  - 20% is sent to the treasury
  - 20% will be converted to \$PAW and saved to reward those keeping their unclaimed rewards on PawFi
  - 20% is converted into \$SHIB and sent to the \$SHIB burn address

## Leveling System

Our guild incorporates a leveling system that offers increased earnings based on your level. As you advance through the 60 levels, your rewards for contributions will increase accordingly. To progress to higher levels, you will utilize \$PAW, which can be acquired by borrowing assets within the guild to earn money from the blockchain games you are playing.

Individuals who achieve level 25 will receive a new profile icon frame, badge, and title. You will be able to claim an exclusive NFT that possess utilities that will be unveiled in the future, including additional in-guild tasks that lead to even more rewards.

Upon reaching level 60, participants will be honored as Legends and will be bestowed with distinctive rewards. As a Legend, you will receive a unique NFT that grants access to the Legends room. You will be granted the legendary profile icon, badge, and title. As a Legend, you will be entitled to retain 80% of your contributions to the guild from the blockchain games you complete using our assets for free.

It is important to note that there is no pay-to-win structure in terms of competitive advantage and is solely in terms of how much a member will earn. This is a similar structure to launchpads and the amount of allocation you receive depends on how much of their native token is staked. However, it will be designed so that you will have the sufficient amount of \$PAW by the time you are ready to move on to the next level had you not sold the \$PAW you earned. The \$PAW spent to level up will then be sent to the \$PAW burn address.

## In-Guild Tasks

Unlock exciting opportunities by actively participating in daily and weekly in-guild tasks, which allow you to earn valuable \$PAW. These tasks operate independently from the earnings you receive within the blockchain games, offering an additional stream of rewards. The best part is that you get to keep 100% of what you collect, maximizing your earnings and boosting your overall progress. By diligently completing these in-guild tasks, you pave the way for increased financial gains and enhance your gaming experience within the guild ecosystem.

## Season Passes

Shiba Inu GG will feature season passes that offer a plethora of enticing rewards as you navigate through the various tiers. In order to progress, you must engage in gameplay using the guild's assets. To participate, all season pass purchases will be conducted in \$ETH (\$SHI once it is released). 30% of the funds will be converted to \$PAW, while another 30% will be converted to \$SHIB before they are sent to the burn address. The remaining 40% will be allocated to cover the funding and creation costs of the season pass.

Some rewards as you progress through the season pass can be expected to include cosmetics, whitelists, assets, PAW, SHIB, LEASH, and BONE as rewards. Additionally, you will have the opportunity to receive distinctive icon frames, badges, and titles, elevating your presence within the guild community.

We want the community to embrace the thrilling progression of the season pass, where each moment of gameplay brings you closer to a multitude of coveted rewards and a heightened gaming experience.

## **Factions**

Embrace the excitement of factional rivalry within our crypto gaming guild, reminiscent of renowned institutions like Hogwarts. Upon joining the guild, you will be randomly assigned to one of several factions. These factions will engage in thrilling tournaments and engage in a race to complete the most Shiba Inu GG objectives, with the victorious faction claiming an enticing prize.

Each faction represents a unique community within the guild, offering camaraderie, competition, and a sense of belonging. As you immerse yourself in the world of crypto gaming, your faction becomes a source of support and motivation. Engage in strategic collaborations with fellow faction members, pooling your skills and expertise to outperform rival factions. Whether it's battling it out in intense tournaments or relentlessly pursuing the completion of Shiba Inu GG objectives, your faction's success brings both individual and collective glory. Prepare for the exhilarating journey that awaits you as you navigate the faction system, forging alliances, competing fiercely, and vying for the coveted rewards that await the victorious faction.

## **Assets**

There will be a diverse collection of assets sourced from a wide variety of play-to-earn games carefully selected by the PAWDAO. In our unwavering commitment to transparency, we have developed an assets page that provides comprehensive information about the assets held by the guild. This page offers a detailed overview of each asset, accompanied by relevant data showcasing the guild's earnings, as well as the total earnings generated by the community.

By visiting the assets page, guild members and stakeholders gain access to a comprehensive snapshot of the guild's asset portfolio. This includes a comprehensive list of all the different assets held by the guild, accompanied by key performance indicators that highlight the financial gains derived from each asset. Clarity empowers our community by allowing them to track the profitability of specific assets and make informed decisions.

## **Profile Page**

The profile page within our crypto gaming guild offers a comprehensive breakdown of your total contributions and the number of hours spent playing each individual game. It serves as a detailed record of your gaming journey, providing insights into your active involvement within the guild. Additionally, the profile page allows you to search other accounts, letting you explore the contributions made by other guild

members and the specific games they have been engaged in. This feature fosters a sense of community, empowering guild members to gain a deeper understanding of their own progress as well as the achievements of their peers. Embrace the profile page as a valuable tool to track and showcase your contributions, while also encouraging a culture of shared experiences within Shiba Inu GG.

### **SubDAOs**

We will employ subDAOs as a means to grant the community decision-making authority pertaining to individual games and genres. This decentralized approach draws inspiration from large conglomerates that allocate separate business units to maintain autonomy and cater to specific interests. By implementing subDAOs, our guild aims to bring together communities with shared interests while also prioritizing security. This structure ensures that if a security breach occurs in one game, all other assets in Shiba Inu GG remain unaffected and safeguarded.

Moreover, the subDAO framework offers a more focused approach, catering to the needs and preferences of guild members who are committed to specific games. Each SubDAO is equipped with dedicated forums, providing a designated space for meaningful discussions and communication pertaining to particular games. This focused environment fosters a sense of community, allowing passionate gamers to connect, exchange insights, write reviews, ask questions, and collaborate on strategies, ensuring a more enriching gaming experience within the guild.

We want our users to seize the power of subDAOs as a mechanism for community empowerment, security, and focused collaboration, providing a platform. A place where like-minded gamers can thrive, communicate, and make meaningful contributions within their preferred games.

# E-SPORTS

E-Sports has become a phenomenon in the gaming world and it is only a matter of time before we begin to witness notorious teams entering the web3 space in the masses. Tournaments are already prevalent in play to earn with incredibly talented players initiating the inevitable movement.

Beyond Shiba Inu Gaming Guild making blockchain games accessible to all players while building a community of gamers, Shiba Inu GG will be forming eSports teams for upcoming blockchain gaming competitions. Our teams will actively participate in tournaments to showcase their skills and compete against other teams. Shiba Inu GG will register for events, organize travel arrangements, and adhere to tournament rules..

Every team must establish a hierarchical structure with designated roles and responsibilities. They will develop practice schedules, strategize game plans, and analyze gameplay footage to improve individual skills and team coordination to refine their overall performance. We want to foster a positive team culture to ensure a healthy and productive environment. This includes team-building activities, fostering camaraderie, addressing conflicts, and providing support to players. Positive team dynamics contribute to better performance and overall team cohesion.

We will seek sponsorships to secure financial resources with the help of sponsors who provide additional resources and equipment in exchange for brand exposure. We will also form partnerships with brands, both within and outside the gaming industry, to expand our reach and access additional resources.

The development of the Shiba Inu GG brand identity will encompass a wide array of merchandise like logos, team jerseys, hats, mousepads, along with a strong social media presence. We will produce high-quality content to entertain and educate our fanbase. This includes creating videos, live streams, podcasts, and articles that feature gameplay highlights, tutorials, player profiles, and team updates. By consistently delivering valuable content, we will establish ourselves as authorities in the blockchain esports industry and attract a dedicated following.

Contracts with players will be established that outline terms and conditions regarding player salaries, benefits, sponsorship agreements, and team obligations. As per contract, we will cover various expenses, including tournament entry fees, gaming equipment, merchandise, coaching or mentorship, travel costs, or even a stipend to assist with living expenses. Applications will be released soon.

# PAW

Unleashing the Power for a Decentralized Future

## DEX

**SHIBASWAP**

## CEXs

**LBANK**

MAKE SURE TO CHECK THE TOKEN ADDRESS AND CONFIRM WE ARE LISTED ON THE EXCHANGE YOU WOULD LIKE TO PURCHASE FROM BEFORE TRANSACTING

# PAW TOKEN

Introduced back in 2021, the PAW token puts all the pieces together.

A token shouldn't be built for the sake of its existence in efforts to have others gamble their money away at your expense. The most important factor to building a token is making sure it serves a purpose that justifies its existence.

**So then, why \$PAW?** As stated previously, the main priority will always be to provide utility for the Shiba Inu tokens. However, the reality is that there needs to be a token to issue governance and allow members to determine the future of the project. This is the only way to reach full decentralization after all.

We would like to think of \$PAW as an unofficially official token in the Shiba Inu ecosystem. The major incentive of \$PAW is to be the currency that fights for the Shiba Inu ecosystem. Although the main priority for PawZone will always remain to add utility and burns for the Shiba Inu tokens, \$PAW needs to have a place in the pack filled with utilities of its own. \$PAW was developed through years of researching other coins similar to it and diagnosing the flaws they had. From there, we envisioned ways to alleviate those flaws. The same applies for the applications in general.

In fact, \$PAW has an immense amount of utility, since it is used in an amalgamation of applications it will have use cases for. We are combining the use cases our token has with an NFT marketplace, play-to-earn Gaming Guild, and DeFi platform. Most tokens have utilities for only one of these.

We removed the deflationary aspect of the tokenomics for PAW since the burn would just be additional tax for those trying to purchase the token. Having burn functions built in the applications, however, would be a much better alternative.

# TOKEN ALLOCATION

Initial Liquidity 50%

Founders – 10%

PawZone Treasury Fund – 20%

Staking, Liquidity, and Trading Rewards – 20%

1,000,000,000,000 total supply  
50% has been burned  
0/0% tax

# PAW UTILITIES

**Governance** - The \$PAW token grants holders essential rights and governs our protocols using a weighted system. The voting power of each holder is determined by the amount of \$PAW they hold, ensuring a fair decision-making process.

**Purchasing Power** - \$PAW holds significant purchasing power within Pawzaar and Shiba Inu GG alone. It can be used as a medium of exchange for acquiring digital assets, leveling up in Shiba Inu GG, and other valuable offerings such as items in our upcoming shop. We want to also encourage purchasing power from other avenues like digital shops and exclusive events.

**Renting and Collateral Currency** - The \$PAW token can be used as a currency for renting assets and as collateral within our ecosystem, providing additional utility and flexibility to token holders.

**Guild Progression** - \$PAW is required for leveling up within Shiba Inu GG, granting members access to higher ranks, exclusive benefits, and increased earning opportunities. All \$PAW used to level up is sent entirely to the burn address, thus helping stabilize the price. All profits made from play-to-earn games in Shiba Inu GG is converted to \$PAW which will positively impact the price of \$PAW and 20% of what Shiba Inu GG earns is then burned.

**DeFi Capabilities** - PawFi harnesses the DeFi capabilities of the \$PAW token, enabling users to participate in decentralized finance activities such as staking and liquidity provision, further enhancing the token's utility and potential returns.

**Raffles and Exclusive Events** - \$PAW token holders have the opportunity to participate in raffles and exclusive events, providing exciting chances to win whitelist spots and engage in significant community activities. All \$PAW is then sent to the burn address, creating even more deflationary pressure.

By incorporating these diverse utilities, the \$PAW token offers a comprehensive ecosystem that empowers holders, stimulates engagement, and amplifies the value of participation within our vibrant community.

## PAW SMART CONTRACT ADDRESSES

Besides initial liquidity, we coded our own contracts for both vesting and lock-up periods

1) TokenPAWZONE Smart Contract URL:

Amount: 50,000,000,000

# WAYS PAWZONE APPLICATIONS GO TOGETHER

Earn \$PAW trading on Pawzaar → Purchase NFTs on Pawzaar using the \$PAW you've earned → Stake \$PAW with your profits on PawFi

Earn \$PAW trading on Pawzaar → Level up in Shiba Inu GG → Earn more \$PAW for your contributions Shiba Inu GG

Earn \$PAW trading on Pawzaar → Purchase NFTs on Pawzaar using the \$PAW you've earned → Level up in Shiba Inu GG with your profits on PawFi

Earn \$PAW contributing to Shiba Inu GG → Level up in Shiba Inu GG → Earn more \$PAW for your contributions

Earn \$PAW contributing to Shiba Inu GG → Purchase NFTs on Pawzaar using the \$PAW you've earned → Level up in Shiba Inu GG with your profits on PawFi

Stake \$PAW you purchased on PawFi → Purchase NFTs on Pawzaar using the \$PAW you've earned → Stake \$PAW with your profits on PawFi

Stake \$PAW you purchased on PawFi → Level up in Shiba Inu GG with rewards → Earn more \$PAW for your contributions in Shiba Inu GG

Stake \$PAW you purchased on PawFi → Purchase NFTs on Pawzaar using the \$PAW you've earned → Level up in Shiba Inu GG with your profits on PawFi

Purchase NFTs on Pawzaar using the \$PAW you've purchased → Level up in Shiba Inu GG with your profits on PawFi → Earn more for your contributions in Shiba Inu GG

Every scenario would burn \$SHIB and use \$BONE for transactions

# WAYS TO EARN PAW

The PawZone ecosystem aims to foster an engaging and rewarding experience for its participants. As an integral part of this vision, the \$PAW token serves as the primary utility token, facilitating various activities and incentivizing user participation. There are three key avenues for earning \$PAW: participating in the guild, trading on Pawzaar, and staking on PawFi.

## **Participating in the Guild**

Shiba Inu Gaming Guild will offer numerous opportunities for users to contribute their skills, knowledge, and time. By actively participating in guild-related activities such as borrowing in-game assets to make income in play-to-earn games or completing Shiba Inu GG tasks, users can earn \$PAW as a reward. In-game profits are converted to \$PAW and distributed as a reward. This incentivizes engagement, fosters community growth, and rewards the dedication of guild members.

## **Trading on Pawzaar**

Pawzaar aims to be the designated NFT marketplace platform on Shibarium, providing users with a secure and efficient marketplace for exchanging digital assets. Our platform's marketplace enables users to seize trading opportunities by earning \$PAW based on their trading volumes and contributions to the ecosystem.

## **Staking or providing liquidity on PawFi**

PawFi, the decentralized exchange within the PawZone ecosystem, presents users with an opportunity to earn \$PAW through staking and adding liquidity to the liquidity pool. By staking their \$PAW tokens and adding liquidity, users earn rewards in the form of additional \$PAW tokens. Staking on PawFi not only enables users to earn passive income but also helps to enhance the overall liquidity and stability of the ecosystem.

The PawZone ecosystem offers multiple avenues for users to earn \$PAW tokens and unlock the full potential of their participation. By actively participating in the guild, trading on Pawzaar, and using PawFi, users can benefit from the numerous incentives and rewards within the ecosystem while positively impacting the price. These earning mechanisms promote engagement, community growth, and the overall success of the PawZone ecosystem. With a focus on user-centric value creation, PawZone aims to build a lively and sustainable ecosystem that rewards active participation and fosters long-term value for its users.

# PAWDAO

We at PawZone believe in the true incentive behind blockchain which is the ability to put the power in the right hands, not those that take advantage of the system. The PAWDAO will enable \$PAW holders to be involved with vital decisions regarding the future of PawZone. **\$PAW acts as our governance token and voting works through a weighted system. Therefore, the more \$PAW an individual holds, the more say they will have in all future decisions.**

The role of PAWDAO, broadly speaking, is to increase user influence in web3 and let \$PAW holders have a say about the projects revolving around their community. We want to give our community the power to influence decisions and incentivize active participation. One of the ways in which this will be achieved is through growing adoption of the PawZone brand by promoting and fostering our ecosystem of projects. The community around the PAWDAO will also generate value in many other ways we can't even fathom. That is, after all, the beauty of a DAO.

**In order to ensure fair and secure decision-making, we have implemented a combination of Snapshot and Multisig protocols.** By utilizing Snapshot, we provide a platform where participants can cast their votes on various matters. This decentralized voting system allows everyone to have a voice and contribute to the decision-making process. Additionally, by incorporating Multisig technology, we enhance the integrity and reliability of the voting system. Through Multisig, multiple authorized individuals or entities are required to validate and sign off on the final outcome, thereby preventing any single point of failure or manipulation. By combining the power of Snapshot and Multisig, we are able to factor in and consider the votes of every participant, ensuring a transparent and inclusive decision-making process.

Here is a list of the many incidences in which the PAWDAO plays a major part in key decisions that will be voted on:

Governance Proposals

Policy Changes

Project Proposals

Strategic Partnerships

Asset Management

Community Grants

Protocol upgrades

Community Initiatives

Application or Service Features

Curation, testing, and moderation

Guild asset purchases

Members should conduct thorough research and analysis before placing their vote.

# PAWFI

*Pawfi will be the platform to stake your \$PAW tokens, provide liquidity, and collect your rewards.*

PawFi, the decentralized exchange within the PawZone ecosystem, presents users with an opportunity to earn additional \$PAW. By staking their \$PAW tokens and adding liquidity, users earn rewards in the form of additional \$PAW tokens. Staking on PawFi not only enables users to earn passive income but also helps to enhance the overall liquidity and stability of the ecosystem.

We believe in pushing the boundaries of innovation and setting new standards. That's why we are developing PawFi, our groundbreaking staking platform, from the ground up, ensuring a unique and unparalleled user experience. Unlike many other DeFi platforms that rely on forks, PawFi is built with meticulous attention to detail, offering a custom-designed solution tailored specifically to the needs of our community.

Furthermore, our commitment to originality and innovation sets PawFi apart from the crowd. We have taken a fresh approach to DeFi staking, incorporating novel features and functionalities such as a leveling system that allows you to earn higher APY the longer you do not take out your holdings. With a user-centric design, PawFi offers intuitive interfaces, comprehensive analytics, and customizable strategies, empowering our community to achieve their financial goals.

Of the 20% allocated for PawFi rewards, they will be further distributed as follows:

Staking 5%  
Liquidity 10%  
Trading Rewards 5%

20% of the total PAW supply has been reserved for reward distribution on PawFi. The LP receives 50% of the reserved mining rewards, while the single stake PAW and Trading Rewards each receive 25%. A portion of every transaction fee on Pawzaar and Shiba Inu GG will be reserved for continued rewards long after our initial reserves have been distributed.

While we began with a PAW/ETH liquidity pool, we will soon introduce a PAW/BONE liquidity pair to prepare for the upcoming layer 2 as this will be the standard pair on Shibarium. PAW/SHIB, PAW/LEASH, and PAW/SHI pairs will follow after in their respective timelines.

The single stake is for the PAW token, while the LPs are a PAW/ETH and PAW/BONE trading pair. You will receive PAW passively for either methods.

By staking your tokens, you contribute to the platform's security while being rewarded with additional tokens. This incentivizes token holders to actively participate in the ecosystem, earn passive income, and support the growth and stability of the decentralized finance platform.

Additionally, you will be able to create the liquidity pairs and provide liquidity directly on PawFi. Providing liquidity for a token on a DeFi platform involves depositing a pair of tokens into a liquidity pool, enabling users to trade those tokens. In return for providing liquidity, participants receive LP (Liquidity Provider) tokens, representing their share of the pool. By holding these LP tokens in the pool, individuals can earn APY (Annual Percentage Yield) in the token they provided liquidity for, allowing them to passively earn additional tokens as a reward for contributing to the liquidity of the platform.

While PawFi will be a separate website, the liquidity pairs are derived from the ShibaSwap liquidity pool to further support the Shiba Inu ecosystem. Furthermore, we would love to end up as a woofable pair on ShibaSwap 2.0 and feel that the chances are in our favor.

We recognize that trust is the foundation of any successful DeFi platform, and conducting a professional audit is an essential step towards building that trust. To ensure the highest level of security, we are committed to conducting a comprehensive third-party audit of our PawFi platform. This audit will be carried out by a reputable and independent security firm that specializes in reviewing DeFi protocols. By subjecting PawFi to a thorough assessment, we can identify and address any potential vulnerabilities or weaknesses, ensuring that our users' funds and information remain protected.

The Dashboard serves as a comprehensive hub, providing macro analytics such as total staked and total liquidity, while also keeping you updated on the emission

schedule. By staking your PAW tokens, you can earn APY (Annual Percentage Yield) in return, unlocking rewards and maximizing your liquidity. The Liquidity page ensures a transparent overview of your earnings, including daily and total earnings, total SHIB burned, paw holdings, and the total amount claimable.

The earnings page will allow you to monitor and manage your activities on PawFi. Here, you can track crucial metrics such as daily earnings, overall earnings, total SHIB burned, paw holdings, and the total amount claimable. This comprehensive overview ensures transparency and empowers users to stay informed about their financial progress within the PawFi ecosystem.

To further support our users, each tab features an FAQ button, offering educational resources and assistance for any questions or concerns you may have throughout the process. With PawFi, you can confidently navigate the world of DeFi and optimize your financial outcomes.

### **Initial liquidity program**

On release, there will be an initial 2 week liquidity program where liquidity providers can receive a higher APY: The process of receiving high rewards for providing liquidity to the different pairs within the PawZone ecosystem.

Beyond our own applications, we envision PawFi to be tied to digital businesses, jobs, and cash flow. Merchants selling products for PAW can stake their earnings for an interest rate exceeding what people receive from banks.

Top Burners

## Get ready to burn your \$PAW and \$SHIB tokens for amazing rewards!

The PawZone burn portal allows users to permanently remove a certain amount of PAW and SHIB from circulation. When tokens are burned, they are sent to an address from which they can never be accessed again. This process reduces the total supply of the token, effectively making each remaining token scarcer and potentially more valuable. A burn portal is beneficial for several reasons. First, it will help create a deflationary environment for PAW and SHIB, increasing their scarcity and potentially driving up their price. Second, it can instill confidence in investors by demonstrating a commitment to reducing token supply and maintaining long-term value. Finally, the burn portal will incentivize token holders by offering additional benefits or rewards to those who participate in the burning process.

**Through an array of enticing features such as the Top Burners Log, Raffle Giveaways, Exclusive Events, and more, we offer an unparalleled opportunity for token holders to unlock rewards. By burning \$PAW and \$SHIB tokens, participants contribute to the ecosystem's sustainability while unlocking exclusive benefits.**

Acknowledging the dedication and commitment of our community members, we proudly present the Top Burners Log. This prestigious leaderboard showcases the names of the most influential contributors, inspiring others to strive for greatness and be recognized for their exceptional efforts.

To inject excitement and anticipation into our community, we will introduce captivating raffle giveaways. By leveraging \$PAW and \$SHIB tokens, participants enter a world of chance, where extraordinary prizes await. This alluring feature encourages active participation, fuels camaraderie, and adds an element of surprise to our ecosystem.

We believe in creating unforgettable experiences for the Pawfighters. As a testament to this commitment, we provide access to exclusive events such as VIP parties, meet-and-greets, travel experiences, red carpet events, and many others. We will curate exclusive events that provide unparalleled opportunities for connection, knowledge sharing, and collaboration. Whether it's insightful panel discussions, workshops, or interactive sessions with industry experts, these events enrich the community and foster meaningful relationships.

The amalgamation of the Top Burners Log, Raffle Giveaways, Exclusive Events, and everything else our burn portal has to offer presents an extraordinary opportunity to earn rewards while being an integral part of our rapidly growing community. We invite each participant to embark on this thrilling opportunity, where collaboration, innovation, and community spirit intertwine to shape a prosperous future.

## SHIBOSHI UTILITIES

PawZone offers numerous added utilities for Shiboshis so if you don't already possess one, refrain from listing yours or acquire one. Engaging in trading activities on Pawzaar with a Shiboshi presents the opportunity to receive bonus rewards. Moreover, Shiboshi holders are granted extra missions to complete on Shiba Inu GG, resulting in even more \$PAW. Additionally, holding a Shiboshi grants you complimentary access to the inaugural season pass on Shiba Inu GG.

Take advantage of these perks and make the most out of PawZone's offerings by grabbing or holding a Shiboshi.

THE  
SHIBOSHIS

## RAFFLES

Raffles are going to be conducted on Pawzaar, Shiba Inu GG, and the burn portal, where your chance to win incredible prizes awaits. By purchasing raffle tickets with either \$PAW or \$SHIB, depending on what currency is used to conduct the raffle, you not only participate in the excitement but also contribute to the burning of tokens. With 100% of the ticket sales directed to the respective burn address of the chosen currency, we actively support the reduction of token supply. Whether it's highly anticipated events like SuperBowl tickets, luxurious meetups, vacations, NFT Con, or coveted NFT Whitelists, our raffles provide thrilling opportunities to engage with our community while contributing to burns.

## MOBILE VERSIONS

Pawzaar and Shiba Inu GG will come with a mobile app that will launch on both iOS and Android. MORE ON THIS COMING SOON.
